👛 PROFESSIONAL EXPERIENCE

Lightning Chart

Frontend Developer & Web Developer

2024 – Present | Kuopio

- Built and optimized interactive **data visualization dashboards** using **React**, **TypeScript**, and **Node.js**, focused on performance and responsiveness.
- Worked in Agile sprints, closely collaborating with **designers and product managers** to turn Figma prototypes into production-ready UIs.
- Ensured **accessibility compliance** and WCAG standards across user interfaces.
- Implemented performance improvements using **lazy loading**, **memoization**, and code splitting.
- Customized and maintained internal WordPress websites, working with page builders (Elementor, Divi) and editing source files such as functions.php and templates to add custom features.
- Used **GitLab** for version control, merge requests, and CI/CD pipeline management.

Philandure Sdn Bhd

Frontend Developer (React)

2021 – 2023 | Malaysia

- Developed and maintained responsive front-end applications using React.js, TypeScript, and Styled Components.
- Collaborated closely with designers to translate Figma mockups into interactive, accessible UI.
- Built reusable components and optimized rendering performance with React hooks and state management libraries (e.g., Context API).
- Focused on **UI accessibility**, semantic HTML, and **user-centric design principles**.

Xorbix Technologies

Web Developer (Wordpress)

2019 – 2021 | USA

- Designed and developed fully responsive **WordPress themes and custom plugins** using PHP, JavaScript, and ACF.
- Built SEO-optimized websites and landing pages using **custom post types**, Yoast SEO, and schema markup.
- Supported accessibility and mobile-first practices to align with modern UX standards.
- Integrated third-party APIs and **enhanced site performance** through caching and minification.
